DETAILED ACTION

- 1. This action is responsive to Information Disclosure Statement (IDS), filed on 6/10/2004.
- 2. Claims 1-72 are currently pending. Claims 1, 18, 28, 31, 39, 41, 49, 57, 60, 65, 71, and 72 are independent claims.

Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, 41-61, 71, 72, drawn to a digital communications system, classified in class 379, subclass 93.24.
 - II. Claims 28-30, drawn to a privileged e-mail messaging system, classified in class709, subclass 206.
 - III. Claims 31-39, 41, 60-70, drawn to a virtual container system for holding header and digital object files, classified in class 707, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention (I) has separate utility such as a two-way electrical transmission of intelligible audio information having arbitrary content over a link including an electrical conductor, between spaced apart locations, so as to enable conversation

Application/Control Number: 09/825,431 Page 3

Art Unit: 2176

therebetween, and intended for the private use of a listener or a group of listeners, invention (II) has separate utility such as processing user data in response to a demand to transfer data between the computers (e.g., electronic mail messaging), invention (III) has separate utility such as generic data, file, and directory upkeeping, file naming, and file and database maintenance including integrity consideration, recovery, and versioning. See MPEP § 806.05(d).

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Nguyen-Ba whose telephone number is (571) 272-4094. The examiner can normally be reached on 10 am - 6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Feild can be reached on (571) 272-4090. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 09/825,431
